LIFE-SAFETY SHOW CONTROL

Cast and Guest Safety is our First Priority

Show control systems integrate the diverse electrical hardware & software elements that execute your performance flawlessly every time. Birket Engineering has provided the control systems for the industry's best-known and most challenging shows.

Birket Engineering provides complete control system design/build/commissioning services for shows with animation, A/V, and life-safety flame, pyro, water, show action, or related effects.

Birket is the developer of Firelinx, the world's safest and most full-featured pyro and show controller. Safety is our number one priority for all of our projects.

Qualifications:

- TUV FS (Functional Safety) Engineers to satisfy ISO 12100 and 13839
- Licensed Professional Engineers
- Panel assembly satisfying UL508a labeling requirements

Sample Projects:

- WaterWorld – A Live Sea War Spectacular, Universal Studios Hollywood, show control system design, build, and commissioning
- Lights! Motors! Action, Disney Hollywood Studios, show control software
- Shanghai Disneyland Resort, show control system design and commissioning for 18 attractions
